Detailed Action

Response to Amendment

1. Applicant's amendment and accompanying Remarks filed 9-2-2003 have been entered and carefully considered.

The amendment is insufficient to overcome the obviousness rejections of claims 17-32.

2. The text of US code absent in this office action can be found in the previous office action.

Claims 17-32 are rejected under 35 U.S.C. 103(a) as being unpatentable over US 5,849,311 to Sawan et al in view of US 5,432,000 to Young, Sr et al as set forth in the previous office action.

Response to Arguments

3. Applicant's declaratory evidence (Rule 132 Declaration of David Green) overcame the art rejections based solely on Sawan et al's disclosure. Examiner agrees that Applicant's declaration demonstrated that Applicant's claimed properties are not inherent to the article of Sawan et al's disclosure. Sawan et al was rendered inapplicable as prior art on its own due to the previously provided declaration. A secondary reference, i.e., Young, Sr et al was provided to remedy the deficiencies of Sawan et al's disclosure. The art combination of Sawan et al and Young, Sr et al clearly results with Applicant's claimed article since the binder disclosed by Young, Sr et al is chemically identical to the binder discussed by the Applicant in the Specification and provides clear motivation for its use with Sawan et al's article. As a result, the

Declaration filed by the Applicant fails to address the shortcomings of Young, Sr et al's teachings by way of a showing of unexpected results. Additionally, the Examiner disputes that hindsight was relied on as motivation for the inclusion of Young, Sr, et al's binder material in Sawan et al's article. In particular Young, Sr et al is directed to discontinuous fibers with a binder material coating that adheres solid particles to the fibers (Col 1, lines 18-21). Binders having good intermolecular contact between the binder and particles are disclosed as especially desirable (Col 11, lines 19-21). Desirable binders provided in emulsion form include polyesters, polyimides, melamine/formaldehyde and epoxy (Col 9, lines 35-67, Col 10, lines 1-19).

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
